What is a Research article?
- A substantial piece of academic writing, in which the author does independent research into a topic and writes a description of the findings of that research.
- A formal written report that includes research findings and a author’s own ideas.
- Research papers are all about organizing your ideas in a linear, understandable format.
- A research paper is a report summarizing the answers to the research questions you generated from the sources you gathered information from, then presenting the work in research paper format.
